

Theresa Wohlever

née Hepburn

5006 Valencia Drive Toledo, OH 43623

+1.860.490.3525 || theresa.wohlever@gmail.com

Experienced bioinformatician, proficient with open source and commercial bioinformatics resources as well as combining analyses through scripting. Effective troubleshooter with excellent communication and organizational skills, who brings together these attributes to provide consistent, high level, quality bioinformatics support and services to researchers and clinicians of varied backgrounds. Seeking opportunities for growth at an organization that emphasizes and proactively supports team focused values.

Specialized Experience

I demonstrate familiarity with the following resources listed left to right from greatest proficiency to least

- *NGS Data*: Illumina, Pacific Biosciences, Ion Torrent
- *Genomic Software*: CLC Genomics/Biomedical Workbench, CLC Assembly Cell, CLC Servers, IGV, BLAST, Newbler, bwa, ARACHNE, Velvet, maq, RDP, JalView, mothur, usearch/otupipe, AbundantOTU, nucmer
- *Programming*: bash/tcsh, Perl, R, \LaTeX , git, svn, Eclipse IDE
- *Internal Systems*: MS Teams, JIRA, Jenkins, Confluence, Salesforce

Research & Work History

QIAGEN Digital Insights (QDI) Toledo, OH

Custom Services Manager, Jan. 2021 - Present

- Lead international team of 4 bioinformaticians and 4 software engineers
- Set customer expectations regarding deliverables and timelines for custom service projects
- Obtain, allocate, and prioritize resources to meet customer expectations
- Sustain multimillion USD client partnerships via "White Glove" level of care

QIAGEN Bioinformatics Chicago, IL

Senior Bioinformatician, May 2016 - Jan. 2021

- Manage multi-year projects for high value clients
- Define requirements, scope, and Statement of Work (SOW) for custom bioinformatic solutions and services
- Effectively communicate with clients and development team to implement project requirements
- Test, release, and support client use of custom tools

QIAGEN Bioinformatics Chicago, IL

Senior Scientist, Oct. 2014 - Apr. 2016

- Analyze, define, and resolve complex scientific and technical issues from scientist and clinician users
- Enable users to successfully harness CLC and Ingenuity product lines to fulfill analysis objectives
- Modify and establish procedures to promptly and comprehensively meet customer needs
- Partner with global R&D, product management, sales, and marketing teams to improve processes
- Establish and revise systems and protocols the team uses for customer engagement
- Contribute to internal documentation for consistent quality support across the globally integrated team

CLC bio Cambridge, MA

Application Scientist, Jan. 2012 - Oct. 2014

- Interpret, replicate, and propose solutions for a broad range of customer questions and problems
 - Troubleshoot and guide assessment of *de novo* assembly and read mapping results
 - Provide basic recommendations for transcriptomic related workflows, ie. RNA-Seq
 - Outline steps to accomplish variant detection and downstream analysis goals
 - Troubleshoot issues with the CLC Workbench, CLC Server, and CLC Command Line Tools
- Effectively and clearly communicate software issues with support team, developers, and customers
- Collaborate on research, drafting, and editing of customer facing text eg. Frequently Asked Questions
- Mentor support colleagues through support system transitions

The Broad Institute of MIT and Harvard Cambridge, MA*Associate Computational Biologist*, Jan. 2010 - Jan. 2012

- Develop and maintain 454 16S filtering and classification pipeline [Perl, L^AT_EX, R, mothur]
- Process 16 ongoing projects consisting of in-house and external data
- Improved accuracy of 16S-based microbial diversity estimations
- Facilitate transition of the 16S pipeline to the Software Engineering team
- Install, support, and maintain group specific software [mothur, RDP, usearch, JalView, etc.]

The Broad Institute of MIT and Harvard Cambridge, MA*Bioinformatics Assembly Analyst*, July 2007 - Jan. 2010

- Propose, develop, and maintain 454 analysis pipeline reducing error and analyst time by 90% [Perl, L^AT_EX, and Gnuplot]: 322 genomes completed including *Brucella*, *Vibrio cholerae*, HMP, *E. coli*, *Staphylococcus aureus*, and *Neisseria gonnorrhoea* strains
- Train the genome finishing team to utilize and upgrade bacterial analysis software
- Characterize and propose solutions for sequencing, library construction, and DNA sample failures
 - Resolve misassemblies due to repeat structure and sequencing/cloning bias
 - Recommend sequencing technology, library type, and coverage for extreme GC genomes
 - Quickly identify and alert sequencing and projects teams to mislabeled DNA
 - Diagnose contaminant sequence sources as collaborators or Broad lab process
- Mentor three junior analysts to successfully accomplish similar responsibilities
- Preliminary analysis of new sequencing technologies for assembly: Illumina, Pacific Biosciences

Rensselaer Polytechnic Institute Troy, NY*Undergraduate Research Assistant*, May 2005 - July 2007

- Design and implement amino acid oligo classifier to predict small molecule binding propensity
- Collaborate with outside researchers on code development for atom type project
- Curate multiple datasets, perform descriptor calculations, and model generation
- Webmaster for the Rensselaer Exploratory Center for Cheminformatics Research (RECCR)

Teaching Experience

Rensselaer Polytechnic Institute Troy, NY*Residence Hall Learning Assistant Coordinator*, January 2005 - May 2007

- Coordinator of 9 Learning Assistants
- Acted as an academic resource for 150 freshmen college students by holding workshops, office hours, and personally distributing newsletters
- Gained crisis management and paraprofessional counseling skills while ensuring the safety and well-being of the students in the residence hall

Rensselaer Polytechnic Institute Troy, NY*Teaching Assistant for Intro. to Cell Biology*, January 2005 - May 2006

- Presented course material and guided 15 students in an introductory cell biology lab

Education

Rensselaer Polytechnic Institute Troy, NY*Bachelor of Science*, August 2003 - May 2007

- *cum laude* 3.56/4.0
- Bioinformatics and Molecular Biology Major 3.29/4.0
- Computer Science Minor 3.70/4.0
