Position Description

QIAGEN Aarhus is a leading center in the development of world class, bioinformatics analysis software. We are looking for Software Test Engineers to work on test and verification as part of our mission to make improvements in life possible.

Your responsibilities will include:

- Take ownership of project quality and provide essential input to risk management
- Design, develop, and execute test on all levels of the software
- Collaborate with product owners, developers, and architects
- Define, build, and maintain test environments for your project
- Take part in requirements engineering with focus on testability, consistency and completeness
- Reporting of quality and test performance

Position Requirements

- BSc, MSc or PhD in Computer Science or related field
- Minimum 2 years of experience as a Software Tester, test manager, or similar in the software field
- ISEB, ISTQB or comparable certifications
- Preferably having experience from a medico IT or other regulated work environment
- Good English skills both written and spoken

Personal Requirements

- Focus on quality
- Good interpersonal communication skills
- Motivated by team success
- Solution-oriented mindset
- Enjoy working in an international environment.

QIAGEN Aarhus is a relaxed, yet ambitious, environment with flexible working arrangements.
If the chance to join our talented development team appeals to you, please apply online.
